Cloud Native Application Management and Service Mesh Across Multicloud

Guang Ya Liu (liugya@cn.ibm.com)

Senior Software Engineer - IBM Cloud Private

Kubernetes Member

Istio Maintainer

Why Multicloud

As our businesses become ecosystems for delivering greater value in a digital world , a multi-cloud strategy is not only the new reality, but the fastest path to new value - connecting multiple cloud environments or connecting cloud and on-premises environments. connecting multiple cloud environments or connecting cloud and on-premises environments.

❑ Unique Needs

You can run each workload where it performs best, for the lowest cost.

❑ Legacy Apps

You can avoid the pain of migrating legacy apps to a new platform.

❑ Desire to Diversify

You can avoid vendor lock-in and latency while creating redundancy.

*8 out of 10 committing to Multi-Cloud
71% use 3 or more clouds*
